

Securing the Perimeter- A Management View

Security is, and should be, on everyone's radar. Whether you control security choices or not, you can raise your awareness and ask the right questions by attending this session. Understand the changes in firewalls, anti-virus, encryption and other tools so you can ask the right questions of your team or contractors. This session will also help you understand the risks you currently have and provide ideas on how to mitigate and minimize your exposure.

Learning Objectives

Upon completing this session, you should be able to:

- Assess the relevant security risks in your organization;
- Identify specific tools and techniques to protect sensitive data;
- List five methods to improve security;
- Build an action plan to safeguard personal and organizational data from potential threats; and
- Implement security procedures to improve organizational security.
